

## LUBRICATION MANAGEMENT SPECTRUM

### Spectrum fluid handling

The new and improved line of Spectrum Oil Containers provides a simple, easy-to-use and error-free solution to identify, store, transport and dispense lubricants.

The Spectrum Oil Containers offer users an excellent way to keep fluids free from dust, dirt, water and other machine damaging contaminants. They play an important role in the lubrication supply chain, especially between bulk containers and top-off points, which industry experts indicate to be the most common source of contamination.

### Modular system

1. *1" Nozzle lid* for topping-off engines, crankcases and areas where higher flow is required.
2. *1/2" Nozzle lid* for use with viscosities up to ISO 460 or where precise pouring is required.
3. *1/4" Nozzle lid* for controlled pouring into small reservoirs or filler holes.
4. *Pump storage lid* allows rapid pouring. Hand pump can be fitted on this lid.
5. *Breather vent* is available in 10 colors. Reservoirs come standard with a black breather vent.
6. *Hand pump* supplied with outlet hose and anti-drip nozzle. To be fitted on the storage lid.
7. *Reservoirs* are available in 3 different sizes: 8 liter, 11 liter and 15 liter.
